

CMPE 101: Object Oriented Programming

Worksheet 7C

Istanbul Bilgi University

Spring 2021

Part I

Explain the difference between static and non-static object with comments.

Part II

Write a loop that gets an integer number from user until the number is same with a randomly generated number. Use a static integer variable to count how many times the loop is executed.

Part III

Write a method that takes an integer value from user and parses the given value to double by using **Wrapper** classes.

Note: Do not compress your files, submit only java files.

Note: Do not forget to justify your answers with comments.
