

# CMPE 101: Object Oriented Programming

## Worksheet 12C

Istanbul Bilgi University

Spring 2021

### Part I

Write a method that takes a *meter* input from user and converts given value to other units of length, i.e. feet and inch.

### Part II

Write a method that writes the given *meter* input and its conversions to a file.

### Part III

Write a method that reads the written length values from a file.

**Note: Do not compress your files, submit only java files.**

**Note: Do not forget to justify your answers with comments.**
