CMPE 101: Object Oriented Programming
Worksheet 8C

Istanbul Bilgi University

Spring 2021

Part I

Write a method takes two parameters: *int array* `arr`, and *boolean* `isEven`. The method returns the summation of the even indexed elements of `arr` if `isEven` is true, otherwise it returns the summation of the odd indexed elements.

Part II

Write a method takes one *String array* parameter and returns the total number of characters in given array.

Part III

Write a method takes one 2-dimensional *int array* parameter and returns one random value in given array.
